

Civil Engineer

Entry to Mid Level

We're looking for problem solvers

Calibre is looking for bright minds to help us solve engineering problems on a variety of project types across the country and internationally. We are looking for civil designers who love to explore and who strive to learn and advance.

In this position, you'll be part of a supportive team and company structure, working with groups of people to solve infrastructure puzzles. You'll have plenty of opportunity to practice different types of design skills to serve a variety of interesting clients. You might work with the Department of Veterans Affairs to honor military servicemen and women. You might design infrastructure for The River Mile in Downtown Denver. You might help a local public agency with a catastrophic failure or a twenty-year planning initiative. You'll love completing the puzzle and working alongside a great team.

This position requires a proficient understanding of civil design.

You'll thrive in this position if you're passionate about:
