

Calibre Internships

Entry Level (School Year and/or Summer)

Join us for an Internship!

Simply submit your resume and cover letter, outlining why you think you would be a good fit for this internship, to info@calibre-engineering.com.

Build Something with Calibre

Ready to start an exciting career in **civil**, **structural**, or **whitewater** engineering? At Calibre, you'll gain more than just experience during your internship. You'll build a career foundation rooted in project diversity, collaboration, innovation, and life-long learning. During our flexible internship program, you'll have the opportunity to build:

- ✓ Confidence
- ✓ Leadership Skills
- ✓ Relationships
- ✓ Opportunity
- ✓ Technical Skills
- ✓ Character

Work & Culture

Calibre's engineering professionals work on federal, military, land development, public infrastructure, and whitewater projects around the world. Right now, our team members are:

- ✓ Leading the engineering for The River Mile in Downtown Denver (Elych Gardens redevelopment)
- ✓ Collaborating with global leaders in whitewater engineering
- ✓ Supporting US Forests, National Parks, and open spaces

Calibre engineers are passionate explorers who look for ways to serve and support each other and our clients. Our culture is focused on team-building and professional growth. It is important to us that our employees feel like members of the Calibre family. We offer a fun and comfortable work environment, employee-focused growth and development, and an open-door policy.

Requirements

- ✓ No prior experience required
- ✓ Junior or Senior enrolled in BS program in Civil, Environmental, or Structural Engineering
- ✓ Basic knowledge of AutoCAD Civil 3D, Revit, or other design programs
- ✓ Completion of or working toward EI/EIT certification is preferred

Job Description

Calibre offers multiple internship positions for students pursuing civil, environmental, or structural engineering degrees from an ABET-accredited university.

Internships focus on one or more of the following service lines, depending on the interests of the student:

Civil Engineering

Calibre's civil engineers are passionate collaborators who find innovative and sustainable ways to deliver smart infrastructure. You'll work on projects focused on water resources, roadway design, and utility infrastructure design.

Structural Engineering

Our structural engineers look beyond standard solutions to deliver safe and cost-effective solutions that align with the project's vision. You'll work closely with your design team on the construction, design, and maintenance of load-bearing structures.

Whitewater Engineering

Calibre's whitewater engineers are global leaders in river engineering. You'll support the design of whitewater parks, rivers, streams, and swiftwater rescue training facilities around the world.

Estimated Pay Scale

This is a temporary, entry-level position and is paid at an hourly rate, based on experience. Temporary positions are not eligible for benefits. Interns may be offered a full-time position with comprehensive benefits upon graduation.

\$20 / Hour
